Function principle:

Signal figures

9 periodic index signal (every 2 mm)
The logical assignment A, B and I-Signal can change

8 Min. Pulse interval: pay attention to the instructions in the technical data

¹⁾ With supply voltage correctly applied

²⁾ A max. of one channel only may be short-circuited:
(when UB=5 V, a short circuit to another channel, 0 V, or +UB is permissible.)
(when UB=5-30 V, a short circuit to another channel or to 0 V is permissible.)

³⁾ At the listed rotational speed the min. pulse interval is 1µs, this corresponds to 250 kHz. For the max. rotational speed range a counter with a count input frequency of not less than 250 kHz should be provided.
